KEEP TRACK OF BABY

There are plenty of books that let you or a caregiver jot down the highlights of baby's day. But the Baby Tracker from Time Too is by far the simplest, most stylish, most no-nonsense planner we've seen (\$38 for the annual refillable binder; Subtle Tones stores, 949-640-2781, or visit timetoo.com) Chart baby's naptimes and feedings to set up a routine, or give the book to a caregiver so she can see what baby's typical day is like. Use it to write reminders to yourself of what baby needs from the store or what medication she's taking. There's also a six-month wire-bound version (\$19) and evening-out pads for nighttime sitters (\$9).
